

All Pro™ Strip Brooms

The superior 100% recyclable AllPro™ Strip Broom achieves cleaner sweeping and creates the most aggressive sweeping available on the road today.

Designed as an alternative to traditional tube brooms, the AllPro Strip Brooms provide efficient sweeping, simple storage, ease of disposal, simplified broom changes and many more cost and time saving benefits. Individual heavy duty brush strips slide into a heavy duty steel mandrel, forming a full size, densely bristled broom. Densely packed, heavy filled, thick diameter brush bristles do the digging and flicking necessary to sweep away heavy debris. When worn, the strips are easily replaced on the mandrel by removing the fiber guard. Slide the old strips out, and new strips in, re-bolt, and in as little as 10-15 minutes you're sweeping.

- Consolidated
- Cost Saving
- 100% recyclable
- Quick Change while on job site.
- Aggressive Sweeping Action
- Convenient for Shipping, transporting, storage and handling
- No need to remove mandrel
- Redesigned Chatter-Free Steel Core Mandrel
